Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 34-40,42-47,49,51-65,69-72,80-96 are rejected under 35 U.S.C. 102(b) as being anticipated by Wardlaw (6,402,784).

Wardlaw discloses a kit of parts and a device for sealably introducing fluent material directly into a disc space through an opening (58) extending through the annulus fibrosis of the disc comprising: a seal (16) for cooperatively engaging the annulus fibrosis adjacent the opening (58) for sealing the opening, tube (30) having a passageway (40) for the flow of fluent material (14) therethrough and an extent (syringe) adapted to be received in the opening of the annulus fibrosis; as set forth in column 10, lines 48-64; the tube being configured for cooperative sealed engagement through the seal; and a vent (24) extending through the seal in sealed engagement therewith and in direct communication with the disc space when the seal engagement engages the annulus fibrosis, a tube having a passage way (40) for the flow of fluent material therethrough and an extent (the tip of the syringe) adapted to be received in the opening of the annulus fibrosis, the tube (30) having a seal (16) adapted to engage said annulus fibrosis adjacent the opening and to form a fluid-tight seal therewith; and a quantity of

curable fluent material (14) adapted to be introduced in a fluid state into the disc space through the passageway of the tube, the material upon curing having properties substitutive of the nucleus pulposus; as set forth in column 3, lines 30-67, column 4, lines 1-65, column 5, lines 1-67, column 6, lines 35-67, column 9, lines 1-67, column 10, lines 49-63; and as best seen in FIGS.1-8.

With respect to the method claims, the method steps, as set forth, would have been inherently carried out in the operation of the device, as set forth above. The method steps, such as, creating an opening through the disc annulus fibrosis; as best seen in FIG.4B, distracting the vertebral bodies apart to increase disc height, FIG.7A; sealably introducing under pressure a curable biomaterial having properties substituve of nucleus pulposus when cured through the opening contiguously into the intradiscal space until the intradiscal space is substantially filled; as set forth in column 3, lines 30-67, column 4, lines 1-65, column 5, lines 1-67, column 6, lines 35-67, column 9, lines 1-67, column 10, lines 49-63; and as best seen in FIGS.1-8.

Response to Amendment

Applicant's arguments, see Remarks, filed 5/14/07, with respect to the rejection(s) of claim(s) 34-40,42-47, 49, 51-65, 69-72, 80-96 under 102 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Wardlaw.

Conclusion

Art Unit: 3733

A shortened statutory period for reply to this action is set to expire THREE MONTHS from the mailing date of this action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Pedro Philogene whose telephone number is (571) 272-4716. The examiner can normally be reached on Monday to Friday 6:30 AM to 4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eduardo Robert can be reached on (571) 272 - 4719. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov.
